TOP 10 AI PROMPTS FOR MIDDLE SCHOOL KIDS & PARENTS

1

THE DINNER TABLE DEBATE

Pretend you are a Debate coach. Give us two sides of the question. Should homework be banned in Schools? Then give each of us (parent and student) one role to argue. After we debate, score us and explain who made strongest,

8

STEM AT HOME CHALLENGE

Suggest 3 fun science or engineering experiments we can do at home using common household items. Explain the science behind each one in simple-terms for a middle schooler.

4

TIME-TRAVEL FAMILY ADVENTURE

Pretend we are travelling through time. Drop us into a famous historical moment (you choose), and describe what we see, then ask us each to make one decision that could change history. Show us the alternate timeline that

5

FAMILY BUSINESS BRAINSTORM

We want to start a small family business, Give us 3 ideas that a middle schooler could help with. For each idea, explain how the parent and child could each contribute, Keep it fun, realistic, and creative.

6

MATH MYSTERY MISSION

Create a short detective story where solving math puzzles helps us find clues. Make it at a middle-school level so the student can solve it, but let the parent join in too. include at least 3 puzzles.

7

PARENT-KID ROLE SWAP

Pretend the student is the parent for one-day and the parent is the student. Create 3 funny but realistic challenges for each of us to complete in our new roles. Then write a reflection about what we each learned.

8

DESIGN OUR DREAM GADGET

We want to invent a gadget that makes life easier, Help us brainstorm one invention, sketch its features in words, and explain how it works scientifically. Then describe how it might look 50 years in the future.
